Ukraine, Kharkiv City. Remote

Can work during blackouts

Skills

- **AI & LLM:** OpenAI, Gemini, RAG, MCP/FastMCP, BGE-M3, hybrid search, tool calling
- **Backend:** Python, FastAPI, Django REST, asyncio, SQLAlchemy, Alembic, Pydantic, Connect-RPC/gRPC, Protobuf
- **Data:** PostgreSQL, Redis/Redisearch, Redis Streams, TaskIQ, PgBouncer, MySQL
- **Voice:** Asterisk, FreeSWITCH, SIP, STT/TTS, Speechmatics, Deepgram, ElevenLabs, Google Cloud TTS
- **Frontend:** Svelte 5, Vue 3, TypeScript, Tailwind CSS
- **DevOps:** Docker, Nginx/Traefik, S3/MinIO/R2, GitHub Actions
- **Quality:** JWT/OAuth2, Argon2id, RBAC, pytest, Ruff, Pyright, Sentry
- **English:** Upper-Intermediate

Integrations & Learning

- **Channels:** Telegram, Viber, WhatsApp, Facebook, Instagram, SendPulse
- **Payments:** Stripe, WayForPay, LiqPay
- **Identity:** Google, Facebook, Microsoft OAuth
- **Telephony:** Zadarma, Binotel, Twilio
- **Learning:** Apache Kafka, Prometheus, GraphQL

Profile

- **AI & Backend Engineer building production-grade LLM platforms, real-time services, and multi-channel automation. Delivered RAG-grounded agents and voice workflows for civic services, sales automation, and personal AI products. Integrated 20+ external services across AI, messaging, telephony, payments, identity, and cloud infrastructure. Strong ownership across architecture, implementation, deployment, and reliability.**

Work Experience

Feb 2024
Present

AI & Backend Engineer — Neurotrack.tech

Delivered production AI platforms for civic services and sales automation, owning backend architecture and reliability. Integrated 20+ AI, messaging, telephony, payments, identity, and cloud services.

Achieved ~2-3s voice response latency across parallel calls with streaming Google STT/TTS, Gemini, and async processing.

Migrated FreeSWITCH telephony to Asterisk while preserving SIP, CRM, and STT/TTS workflows.

Jan 2023
Feb 2025

Python Developer — Independent Projects

Built Django and FastAPI backends with REST APIs, JWT authentication, payments, background jobs, and Docker deployments.

Implemented Stripe payments, Telegram notifications, Celery tasks, and Swagger/OpenAPI documentation.

Developed e-commerce workflows, asynchronous services, and S3/Dropbox media storage.

Tech: Python, Django REST Framework, FastAPI, PostgreSQL, Redis, Celery, Docker.

Jan 2014 Feb
2024

SkyLink Fiber Networks Fiber Optic Technician

- Installed and maintained FTTH networks for residential and commercial customers.
- Performed fusion splicing, OTDR testing, and signal-loss diagnostics.
- Coordinated fiber route planning and field implementation with engineering teams.

Tools: fusion splicing, OTDR, FTTH.

TRAINING

Python Development — Mate Academy

Python Development — Hillel IT School

Python Programming — Stepik

Algorithms — LeetCode & Codeforces

PORTFOLIO

CivicAI — Civic AI Platform

Description

Production civic AI platform supporting 5 communication channels with RAG-grounded responses and real-time operator workflows.

Implemented Features

Telegram, Viber, WhatsApp, Facebook and Instagram
8-format KB pipeline with hybrid BM25/vector search
Guardrails, automated escalation and real-time operator workflows

Technologies

Python, FastAPI, SQLAlchemy, Alembic, Svelte 5, PostgreSQL, Redis/RediSearch, Redis Streams, TaskIQ, BGE-M3/TEI, OpenAI, Gemini, WebSockets, S3, Docker

Links

Live: <https://civicai.pp.ua>

github: <https://github.com/kram3ko/Cognify>

SalesDep — AI Sales Automation

Description

AI-powered text and voice sales platform with website widgets, SIP telephony, CRM automation and omnichannel engagement.

Implemented Features

~2-3s end-to-end voice response latency across parallel calls
Streaming Google STT/TTS, Gemini and non-blocking async processing
FreeSWITCH-to-Asterisk migration with SIP and CRM workflows

Technologies

Python, FastAPI, Laravel, Vue 3, PostgreSQL, Redis, TaskIQ, OpenAI, Gemini, MCP, gRPC, Asterisk, FreeSWITCH, SIP, Google STT/TTS, Speechmatics, WebSockets, Sentry, Docker

Links

Live: <https://salesdep.ai>

Codex Server — Personal AI Platform

Description

Multi-user personal AI platform across Web, Telegram and voice with durable HTTP/2 streaming, memory, uploads and MCP tools.

Implemented Features

Durable AI turns via TaskIQ + Redis Streams with interrupt, steer and reconnect
Connect-RPC/Protobuf server streaming and FastMCP integrations
Speechmatics STT, Google Cloud TTS, image delivery and observability

Technologies

Python 3.14, FastAPI, SQLAlchemy, Alembic, Svelte 5, Connect-RPC, Protobuf, FastMCP, TaskIQ, PostgreSQL, Redis Streams, S3/MinIO/R2, Docker, Traefik, Sentry

Toyshop — Online Store

Django e-commerce app with catalog, authentication, admin workflows, HTMX interactions and Dropbox media storage.

Python, Django, HTMX, Tailwind CSS, PostgreSQL
